Salk Edge is a two-week summer program designed to equip PhD students with advanced research skills and professional development tools for successful careers in science. Students are trained on cutting-edge techniques and the program provides support for the implementation of these techniques in their home labs.

Salk Edge is a competitive program that helps prepare students for postdoctoral positions in top-tier labs across the country.

2 week courses at the Salk Institute in La Jolla, California

- Covered travel and lodging
- Plus \$1,500 pilot funding for your home lab

PhD students of all backgrounds are encouraged to apply.

Please contact **community@salk.edu** for more information.

Choose a topic*:

Computational
Neuroscience

Bioinformatics of
Immune Cells

Genome Editing
in Cancer
